

Dear FCC;

In reference toMB Docket No. 04-233, We desire to contact you to assure that when you address LPFM stations, and their need, we want to be assured that in no way will they interfere with the ability of the listeners to stations such as KLOV which use FM translators to broadcast to our communities. K-LOVE which broadcasts in our area on 88.7 , 96.5, and 88.7 using translators enable us to receive this very specific Christian Radio Station to areas of our community which any one transmitter or translator can't reach. We appreciate the format of this station, and appreciate the ability to enjoy this station and its all music format at our home, in the office and when we travel. It is also valuable for those with alike values, music appreciation and faith, to be able to listen to this music across the country, live and at the same time.

We appreciate some of our local Christian Stations for local programming, but they don't fill in the entire need and desire of the listener. After a while, some of our local stations become stale and hoaky. Just as any other syndicated type format (Talk Show etc.) we appreciate the format, personalities, and music put out by our favorite Christian Music Station KLOV and Air-1.

They produce a very fresh, professional format of programming that crosses over many denominations of Christian listeners.

Thank you for your Consideration in protecting our stations,

Chris and Annamarie Arnold
